# The TÜV Organisations In Germany Are Rooted In The Idea Of Industry Practising “self-help”

- At the end of the 19th century, industrial concerns joined to form associations to provide quality assurance in the manufacture and operation of steam boilers.
- These so-called "DÜVs" eventually took over activities on behalf of government in all technical fields.
- Through a series of mergers, the numerous small associations in Germany consolidated to form the present TÜVs.
- TÜV NORD was formed in 2004.
